Continuation of 11. does NOT place the application in condition for allowance because: Applicant's argument that Muraji does not disclose or suggest "a space between said stator and said rotor, defining over substantially 360 degrees, as a main air gap including at least two movable magnetic poles." Muraji clearly discloses in fig. 7 (c) a space between said stator (140) and said rotor (146, col. 8, line 57), defining over substantially 360 degrees, as a main air gap including at least two movable magnetic poles (144, 145)." Muraji clearly discloses in fig. 7 (c) that rotor is 146 and the space between the rotor and stator is substantially 360 degrees. Applicant's argument "as far as the definition of an air gap is concerned, refers to the parts having a magnetic function" this limitation is not in claims.
